

PROJECT UPDATE

Aliquippa, Clarion Work Recently Completed

Aliquippa, PA - LMI recently completed major foundation work at a manufacturing facility in Aliquippa, PA. The work was done in preparation for the erection of a 35' x 42' bag house. Ron Trott, LMI's ironworker foreman, provided expert supervision for this project. Ron has been

with LMI for the past ten years and is a vital part of our team.

Clarion, PA - LMI has completed work on eight foundation projects at a large masonry and fiber board manufacturing plant in Clarion, PA. The work was completed over the course of two months

and was closely supervised by newly promoted project manager, Ben Wilson. The success of these projects has led to requests for additional quotes from the client.

AROUND THE SHOP: More Expansion News

Our expanded outer fabrication bay houses a 5 ton crane and additional fabrication stations.

This past Summer, LMI erected a 40' x 40' addition to our outer fabrication bay. The larger bay houses a 5 ton crane that aids our plate fabrication division. Shop manager Matt Latore has been busy relocating machinery including our press brake, plate

shear and burning table. The move will allow for additional fabrication stations and more room for raw materials storage. The additional space will greatly improve work flow and allow us to offer our clients even better project pricing.

LMI Adds VP to Lineup

In October, 2017, LMI made the decision to become a Varco Pruden distributor. Varco Pruden (VP) is a world leader in providing innovative pre-engineered steel building systems. LMI's association with VP is part of our plan to significantly grow our steel building business in 2018.

On October 9th, Matt Latore and Jim Salvatore traveled to Columbus, Ohio to attend VP's 3-day software training program. Jim was impressed, stating, "VP's design

software far exceeds the capabilities of other building distributors. VP offers distributors and their clients excellent support including 3D graphics and innovative designs. They're energy efficient, aesthetically pleasing and offer optimum functionality".

With the help of VP District Manager, BB Parikh, we look forward to making substantial strides in the

pre-engineered steel building segment of LMI's plan for success in the coming year.

Quality Solutions. Quality People. That's LMI.

Metal Fabrication

- Platforms & Stairs
- Handrails
- Chutes, Stacks & Ductwork
- Custom Domes & Tanks

Winter 2017/2018

Ben Wilson Promoted

Ben Wilson has been promoted to Project Superintendent at LMI. In his new position, Ben will be based in our New Castle office and will work closely with Site Superintendent, Gary Blakely.

Ben began his career as a journeyman carpenter. Now, with over 30 years experience, he has contributed to many successful projects here at LMI, including recently supervising a highly successful industrial project in Austintown, Ohio.

We wish Ben continued success in all of his endeavors here at LMI.

LMI Expanding

After seven weeks of construction, LMI's new 80' x 100' warehouse in New Castle, PA is nearing completion.

Completely erected by LMI employees, it is a testament to the talent and skills of everyone involved. These same talents and skills ensure that all our client's

projects are completed on schedule, within budget and of the highest possible quality.

Our new warehouse will be utilized as a storage facility for tools, equipment and outage materials and is scheduled to open by the end of December, 2017.

A look inside LMI's new warehouse facility scheduled for completion before the end of 2017.
